

Proposed Area of Potential Effects for VA Black Hills Health Care System Reconfiguration

The Battle Mountain Branch of the National Home for Disabled Volunteer Soldiers was listed as a National Historic Landmark (NHL) in 2011.

Area of potential effects (APE) means the geographic area or areas within which an undertaking may directly or indirectly cause alterations in the character or use of historic properties, if any such properties exist. The APE is influenced by the scale and nature of an undertaking and may be different for different kinds of effects caused by the undertaking.

The **contributing resources** (noted by the ♦ symbol in the Building Legend) of an NHL are buildings, sites, structures, or objects that add to the historical associations, historic architectural qualities, or archaeological values for which a property is nationally significant because they were present during the period of significance, relate to the documented significance of the property, and possess a high degree of historical integrity.
