

Do You See a Private Health Care Provider?

VLER Health may benefit you! VLER Health is a program that shares certain parts of your Veteran's health record between the Department of Veterans Affairs (VA), the Department of Defense (DoD), and selected private health care providers over a secure and confidential network known as the eHealth Exchange (eHE). This program is **free** and voluntary for the Veteran.

How might VLER Health benefit me? Many Veterans receive a portion of their care from private health care providers; either on a co-managed care basis or due to need for emergency care. VLER Health allows private providers, who are members of the eHealth Exchange, to view certain parts of your VA medical records more quickly to make timely and informed decisions about your care.

What parts of the record will be shared? Private health care providers will see a list of health problems, allergies, medications, vital signs, immunizations, chemistry, hematology, discharge summaries, history, physicals, procedure results, encounters, results, and progress notes.

How do I join? Signing up is fast and easy. You may sign up online, by mail, or in person.
